Concept note:

CSF2022 - NGO Collaborative Session, Friday, February 11th
10:00 am - 11:00 am EST

NGO Collaboration Session:

In the spirit of partnerships, what is your organization doing to eradicate poverty and hunger, and achieve wellbeing and decent work?

This session is open to NGOs interested in partnerships and collaboration. It will bring together organizations active on the ground, whose work is focused on the eradication of hunger and poverty and/or inclusive and resilient recovery from COVID-19 for sustainable livelihoods.

With the objective of fostering a spirit of partnership and connection among civil society leaders, this session will place NGOs in small virtual groups to exchange their ideas, experiences, and good practices with an eye to collaboration. In the spirit of SDG 17, participants will be asked to produce concrete outputs (ex: joint blog posts, webinars, written statements, or new projects and partnerships) to strengthen NGO capacity and the visibility of their cause.

As an opportunity to virtually collaborate with people in similar and diverse fields, this will enable grassroots experiences of innovative projects and effective programmes to be shared and celebrated through discussion. Participants will be organized into thematic groups of their expertise so as to create a dialogue with other experts in the same field. This will allow new partnerships to be fostered and ideas to be generated focusing on how your organization supports the priority theme.

The aim is to achieve tangible outputs, using the Civil Society Forum as a springboard to move us from words to actions.
